

Kripesh Nihure

AI Engineer · LLM / RAG / Voice AI · Cloud & NLP

Lalitpur-10, Nepal · +977 9866431550 · nihure.kripesh@gmail.com · linkedin.com/in/kripesh-nihure77

SUMMARY

AI/ML Engineer specializing in domain-adapted LLM systems, enterprise-scale NLP pipelines, and production-ready ML applications. Full ML lifecycle experience — from corpus curation and transformer fine-tuning to low-latency deployment and cloud architecture. Currently architecting multi-tenant RAG platforms and engineering real-time Voice-to-Voice conversational AI at Wiseyak.

EXPERIENCE

Artificial Intelligence Engineer — Wiseyak

March 2026 – Present · Kathmandu, Nepal

- Architecting a multi-tenant RAG platform enabling organizations to deploy domain-specific AI assistants over their own knowledge bases.
- Designing hybrid retrieval combining semantic search, keyword search, reranking, and knowledge graphs to reduce hallucinations.
- Building end-to-end pipelines: ingestion, chunking, embeddings, vector indexing, retrieval, reranking, generation.
- Contributing to a real-time Voice-to-Voice platform with streaming STT/TTS, VAD, contextual memory, and LLM orchestration over telephony.

Junior Data Scientist — 108 Capital Pte. Ltd.

May 2025 – February 2026 · United States (Remote)

- Built domain-adapted NLP/LLM systems using proprietary datasets from a year of monitored social-media activity.
- Designed corpus curation, preprocessing, tokenization, and labeling pipelines for large-scale transformer training.
- Performed domain-adaptive pretraining and fine-tuning; improved downstream performance by 3–5%.
- Developed LLM-assisted annotation pipelines producing high-quality supervised data at scale.
- Feature engineering and evaluation for predictive and NLP tasks reaching up to 94% accuracy.

Cloud Apprentice — Adex International

March 2025 – April 2025 · Kathmandu, Nepal

- Hands-on AWS practice across compute, storage and networking while preparing for the AWS Solutions Architect Associate certification.

Data Science Fellow — Code for Nepal

May 2024 – April 2025 · Nepal

- Curated local datasets and supported data-literacy initiatives in the Nepalese tech community.

Event Manager — IT Club, Pulchowk Campus

February 2023 – January 2024 · Pulchowk, Nepal

- Organized technical events, workshops and speaker sessions for the campus engineering community.

SELECTED PROJECTS

Enterprise RAG Platform. Multi-tenant SaaS with hybrid retrieval (semantic + BM25 + reranking + KG), per-tenant prompts and workflows.

Voice-to-Voice AI. Streaming STT/TTS with VAD, contextual memory and LLM orchestration for human-latency phone conversations.

NLP-to-SQL Analyst. Schema-aware grounded generation turning natural-language questions into verified SQL against production warehouses.

Skin Disease Classifier. EfficientNet-based classifier for dermatology imagery, packaged for offline inference on modest hardware.

News Summarizer & Plagiarism Detector. Transformer summarization and semantic-similarity plagiarism detection pipelines.

SKILLS

Generative AI & LLMs: RAG, hybrid retrieval, reranking, knowledge graphs, prompt engineering, V2V pipelines.

NLP: Domain-adaptive pretraining, fine-tuning (Transformers, T5, TinyLlama), annotation, corpus curation.

ML & Engineering: PyTorch, HuggingFace, Scikit-learn, EfficientNet, feature engineering, evaluation.

Cloud & DevOps: AWS, Azure, GCP, Docker, Kubernetes, CI/CD.

EDUCATION

Tribhuvan University, IOE — Pulchowk Campus

B.E. Computer Engineering · May 2021 – July 2025

Orchid Science College

High School Diploma, Mathematics & Computer Science · 2018 – 2020

CERTIFICATIONS

- Data Scientist Associate
- AWS Certified Solutions Architect – Associate
